933 Castlereagh Road,  
Castlereagh NSW 2749

Feeding can be complicated; age, breed, gender and exercise regime all play a part in your animal's overall condition and nutritional requirement. All animals always need free access to plenty of fresh cool water and a regular worming regime. We recommend you seek professional advice from your veterinarian or equine nutritionist should you require any further assistance in enhancing performance and condition of your animal.

To the maximum extent permitted by law, Castlereagh Feeds shall not be held liable for any losses resulting from the use or misuse of information contained on this brochure.

# PROBREED

## Complete Breeding Pellets

### SCIENTIFICALLY FORMULATED TO MEET THE NEEDS OF GROWING AND BREEDING HORSES

Castlereagh ProBreed pellets are a set formulation and are formulated to meet the special nutritional needs of broodmares in pregnancy and lactation. The high protein and vitamin/mineral content is ideal for creep feeding foals.

➔ Highly palatable steam rolled barley and canola oil for cool, conditioning energy. Digestible slow released energy to optimise growth rates.

**Ca<sup>+</sup>** Bone strengthening calcium (from two forms) and phosphorus in a balanced ratio for optimum growth, health and condition.

🏋️ High on quality protein to support muscle development of growing horses and promotes the milk quality of lactating mares.

**+** Essential Omega -3 and -6 fatty acids to promote overall health, body and coat condition.

### Ingredients

Lucerne meal, steam rolled barley, soybean meal, crushed lupins, wheat bran, wheat pollard, di calcium phosphate, calcium carbonate (limestone), Molafos EzGlo, canola oil, salt and ECS vitamin and mineral premix.

### Nutrition & Feeding

Type of horse	ProBreed daily ration
Weanling	2 - 4 Kg
Yearling	3 - 5 Kg
Dry / Pregnant Mare	2 - 3 Kg
Lactating Mare	4 - 6 Kg
Spelling	2.5 - 4 Kg

PROTEIN (%)	FAT (%)	FIBRE (%)	DIGESTIBLE ENERGY (Mj/Kg)	SALT MAXIMUM (%)
16.9	5.7	8.5	12.7	1.0
