Castlereagh NSW 2749

Feeding can be complicated; age, breed, gender and exercise regime all play a part in your animal's overall condition and nutritional requirement. All animals always need free access to plenty of fresh cool water and a regular worming regime. We recommend you seek professional advice from your veterinarian or equine nutritionist should you require any further assistance in enhancing performance and condition of your animal.

To the maximum extent permitted by law, Castlereagh Feeds shall not be held liable for any losses resulting from the use or misuse of information contained on this brochure.

## High Protein Pellet

### HIGH PROTEIN, GRAIN FREE PELLET FOR OPTIMISING MUSCLE GROWTH, DEVELOPMENT & RECOVERY

Highly palatable and digestible feed for supporting horses in work and mature horses. Ideal for fast growing foals, yearlings through to full maturity, barren & brood mares.

Premium grade grain-free pellet, suitable for horses intolerant to cereal grain, including those prone to laminitis.

Contains an equine specific premix supplying essential minerals, trace minerals (in a combination of organic and inorganic forms), fat and water soluble vitamins.

It contains high quality natural sources of protein to help supply essential amino acids that help support muscle development, cell renewal, tissue, and muscle recovery.

Designed as an 'easy to use' pellet to enhance digestibility and consistent dispersion when mixed with other feeds. Can be used in conjunction with any type of feeding regime to support nutrient consistency.

### Ingredients

Cracked lupins, soymeal, lucerne meal, dicalcium phosphate, Molafos EZ Glo, calcium carbonate (limestone), canola oil, salt and ECS Nutrition premix.

### Nutrition & Feeding

#### Type of Horse

Adult horses	1 Kg
Growing horses	1 - 1.5 Kg
Brood Mares (Dry/Pregnant)	1 - 1.5 Kg
Lactating Mare	1.5 Kg

PROTEIN (%)	FAT (%)	FIBRE (%)	DIGESTIBLE ENERGY (Mj/Kg)	SALT MAXIMUM (%)
28.4	7.0	10.8	11.6	1.0
